## Osmosi (Steel, Glass, I.T. and Light 3.0 versions)

A water treatment system based on the principle of reverse osmosis, to break down the content of nitrates and other substances dissolved in the water giving the post osmosis-treated water a very low TDS count. (A water outlet is needed)

## Nano Silver pipe

Stainless steel tube AISI 316L with an innovative nanotechnology-based SILVER ion treatment on the surface. Silver is naturally bacterio-static and so reduces bacterial growth in the pipe. The surface treated with these nano particles is much more compact and smooth: this prevents the formation of deposits, biofilm or bacterial colonies and because the water flows better through the tube, also reduces dripping at the end of dispensing.
